project cars racing icons pack

lol what the idiots that cry about this being DLC dont understand is that it costs money to license cars and it also costs money to pay the people to model the cars and so forth. that being said: for 3.50 this is a steal. the CLK-LM alone makes it worth 3.50. Quite a fun game. Other than the gamers that like to ram. I recommend to my friends.. Nice one, a DLC pack with a nice price for once !. Thank you. Great CARS. Brilliant DLC. Lovely price.. 5 new cars for u00a31.99? Awesome! The V12 LMR alone is worth the price of this pack.. amazing and so cheap cars handle amazingly and are well polished. Wonderful selection of cars, wonderfully priced. SlightlyMadStudio's are really onto a winner here. Fave car of the pack goes to the "Mercedes-Benz CLK LM." I just love the sound of that V8 u2665. These cars are all crazy fast and handle great, and the sound of the Continental GT is absolutely glorious with a subwoofer. Also \$3.29 for 5 beautifully detailed cars? Awesome. I'm not usually a huge DLC fan,

but THANK YOU for fair pricing.. u00a31.99 is a fair price everyone can afford, wish all developers would take a leaf out of slightly mad studios book.
